Stirling PDF Auto Splitter Page divider

Make your document scanning seamless with Stirling PDF!

Simplify your document scanning with this divider page and Stirling PDF's Automated Splitter feature. Here's how:

1. Insert this divider sheet between documents in your scanner's feed.
2. Scan your entire document pile in one go.
3. Upload the scanned PDF file to Stirling PDF.
4. Stirling PDF will identify these divider pages, split your documents accordingly, and remove these dividers in the final outputs.

Key Features:

- Use multiple divider sheets in a single scan.
- Works for black & white printouts.
- Eliminates the complexity of manual document separation.
- Divider pages are automatically detected and removed, ensuring a clean final product.
